

Our Environment – Our Responsibility

The environment is everything around us — **air, water, soil , plants, animals, and humans**. It *affects* all forms of life and needs to be protected. ~~Ignore Nature~~

1. Natural Environment

It includes forests, rivers, mountains, climate, and wildlife.

2. Human-made Environment

Cities, roads, industries, and technology built by people.

3. Social Environment

Our traditions, culture, and society form this part of the environment.

Visit this [UN Environment Programme](#) to know more about saving our planet.

Ways to Protect Environment

- 1. Plant more trees
- 2. Save water
- 3. Reduce plastic use

Materials for Awareness Campaign

- Posters
- Banners
- Recyclable paper

Comparison of Environment Types

Type	Examples	Importance
Natural	Forests, Rivers	Supports life
Human-made	Cities, Roads	Improves lifestyle
Social	Culture, Society	Connects people
