

OUTPUT

Our Environment – Our Responsibility

The environment is everything around us — **air, water, soil , plants, animals, and humans**. It *affects* all forms of life and needs to be protected. ~~Ignore Nature~~

1. Natural Environment

It includes forests, rivers, mountains, climate, and wildlife.

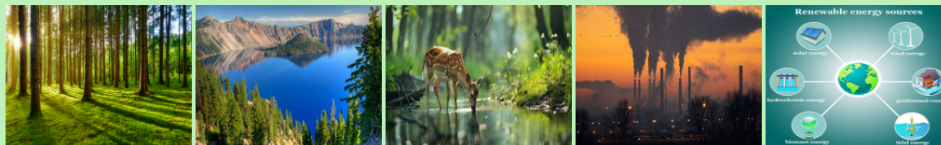

2. Human-made Environment

Cities, roads, industries, and technology built by people.

3. Social Environment

Our traditions, culture, and society form this part of the environment.

Images of Environment

Learn More

Visit this [UN Environment Programme](#) to know more about saving our planet.

Ways to Protect Environment

1. Plant more trees
2. Save water
3. Reduce plastic use

Materials for Awareness Campaign

- Posters
- Banners
- Recyclable paper

Comparison of Environment Types

Type	Examples	Importance
Natural	Forests, Rivers	Supports life
Human-made	Cities, Roads	Improves lifestyle
Social	Culture, Society	Connects people
